

Aqua Protec Ltd are looking for Trainee Service Operatives to join our highly successful water treatment and hygiene team to further contribute towards the growth and development of the company.

We welcome ambitious individuals new to the water industry as all training will be provided by the Company, providing the first step in a career within water treatment and hygiene.

Duties

- Completing pre-planned water maintenance tasks on various sites including NHS Hospitals, Independent Care Homes, Hotels, Council buildings and Universities
- Preventing scalding through compliance checking and maintenance servicing of Thermostatic Mixing Valves
- Analytical sampling from water systems for biological and chemical parameters
- Assisting Team Leaders in implementing mechanical services to modify and develop building water systems
- Supporting Team Leaders in executing chemical system disinfections
- Opportunities to develop a competent understanding of water hygiene and legionella control through working with our Consultants

Necessary Skills

- The ability to communicate well both verbally and in writing
- The ability to be able to work successfully, effectively and safely in unusual situations
- Efficient at time management and to meet deadlines without compromising safety
- Motivated and flexible
- Full, clean UK driving license
- Candidates must be eligible to work and live in the UK

Desirable Skills

- Experience within the Water Industry
- Plumbing qualification, e.g. NVQ Level 2
- Bpec or equivalent Water Regulations Training

Package

- 28 days holiday per annum including bank holidays
- Full technical training and on-going career progression
- 37.5 hours per week permanent contract – with opportunity for overtime
- You will be required to work at various locations within the UK and occasional weekends on a rota basis with out of town living allowance and bonuses
